To the comrades of Olme  
Greece

Assunto: GREETING

## **GREETING**

The increase of exploitation and people's further impoverishment is now the priority of capital. In Greece, as in Portugal, the attack on workers' rights and salaries is very violent. Our countries are truly being robbed and troika (IMF-EU-ECB) entered a spiral of madness that seems to have no end. Simultaneously, our countries' governments, hostages of troika and submissive before the blackmail it exercises, develop neoliberal policies and impose harsh austerity measures that are absolutely unbearable.

The workers' fight is, therefore, fair and necessary and that's why the solidarity that comes from friends and comrades is so important, giving even more strength to those who fight.

That is why, on behalf of the Portuguese teachers, the FENPROF - National Federation of Teachers welcomes the fight of all Greek teachers and workers, wishing a great success for the General Strike on September 26, not only what regards the level of adhesion, but also the results which it may produce.

Cordial Greetings
